

Intercim announces the signature of a framework agreement with EADS

About Intercim

Intercim has a 25-year history of helping advanced and highly regulated manufacturers reach their business goals through best in class software solutions.

Early 2009, Dassault Systèmes a world leader in 3D and Product Lifecycle Management took a minority position in Intercim. Both companies consider critical that information exchange and collaboration between engineering, manufacturing and the supply network be handled in real-time. For the first time, the combination of Intercim's software capabilities with the virtual experience provided by Dassault Systèmes' solutions allows this type of mission-critical collaboration and knowledge sharing.

Intercim works mainly for advanced and highly regulated industries and with industry-leading customers such as Boeing, Sanofi Pasteur, Ball Aerospace, BMW, and Honeywell.

Paris, April 1st 2010 —

Intercim, one of the first authors of Manufacturing Operations Management (MOM) software solution for complex and highly regulated industries signs a framework agreement with its historical customer, EADS.

The signature of this contract marks an important stage in the relation between Intercim and its customer EADS following successful collaboration of 5 years and twenty projects in several subsidiaries of the group. This contract allows the purchase of all the modules of Intercim's Pertinence Suite software, and associated services for each of the subsidiaries of EADS worldwide. It also anticipates the incorporation of modules to come, notably those jointly developed with Dassault Systèmes.

Through this framework agreement, any subsidiary of the EADS group benefits from attractive rates to acquire a Pertinence Suite server and deploy a large number of concurrent users. The Pertinence Suite license management system allows EADS to centralize license management and anticipate its future needs.

Yann d'Aramon, Director Europe of Intercim is very pleased: « We are of course very happy with the signature of this framework agreement by one of the recognized leaders in worldwide aircraft manufacturing. This contract is on one hand, recognition of the value that we have brought to EADS group in the past years, and on the other, a mark of trust that we will continue to add value for them in the future; it is especially the guarantee of a simplified, quicker and more efficient collaboration between our teams. »
