FOR IMMEDIATE RELEASE

Brazil-based Multicorpos to Resell Intercim's Pertinence Suite powered by Velocity

ST. PAUL, Minn. – July 20, 2009 – [Intercim](#) LLC, a global leader in manufacturing and production operations management software solutions for advanced and highly regulated industries, announced today that Brazilian company [Multicorpos](#), a provider of services and products to the aerospace, aviation and defense industries, will resell its Pertinence Suite powered by Velocity solution in Brazil.

Multicorpos is a fast developing company with deep expertise in the automotive and aeronautics industry. Based in Brazil, it offers its customers engineering support as well as technology development and implementation assistance.

As Intercim has been working with potential customers in South America for more than a year, this partnership with Multicorpos provides the company with the established, local connection that it needs in order to offer support in Brazil's native language for Intercim's growing customer list.

"Evidenced by Intercim's recent 100,000 users milestone, customers all over the world have benefitted from our solutions," said Intercim President and CEO John Todd. "To date, the vast majority of our users have been located in North America and Europe, but we recognize there is a great need for our solutions in the South American region and are delighted to have partnered with Multicorpos to assist us in entering that market."

"As a certified reseller for the Dassault Systèmes products, we see Intercim as the perfect extension of engineering to the shop floor," said Multicorpos Director Robson Galvão. "We are impressed by its broad MES and Quality Management capability, which offers manufacturers a totally new way of connecting engineering data with day-to-day manufacturing. In today's challenging environment, where pressure on cost reduction increases everyday, there is a great need to reduce time to market for complex materials and products. Intercim's solutions help address this need to manage complex processes when things in manufacturing go as planned and especially when things are changing. We're looking forward to working with such a forward-thinking company and representing its products in the Brazilian market."

About Intercim

Intercim has 25 years of experience in helping discrete manufacturers meet regulatory requirements, harness lean principles, manage quality and execute processes in a paperless environment. The company is a demonstrated leader in manufacturing and production operations management software solutions for advanced and highly regulated industries. Intercim has offices throughout the United States and in Europe, with industry-leading customers such as Boeing, Sanofi Pasteur, Airbus, Ball Aerospace, BMW and Honeywell. In addition, as part of its initiative

to provide the utmost in operational excellence, the company also has technology partnerships with Dassault Systèmes, SAP and Microsoft. For more information, visit www.intercim.com

About Pertinence Suite powered by Velocity

Pertinence Suite is the first true end-to-end manufacturing operations solution developed with Operational Excellence in mind. The Suite supports all Lean, Six Sigma and other process initiatives implemented throughout the world. From simplified process planning and advanced predictive analysis to best-in-industry process execution and quality management, the Pertinence Suite helps customers reach their operational goals in a very short time.

About Multicorpos

Multicorpos was initially established in the Parque de Alta Tecnologia of Sao Carlos (ParqTec), with infra-structure and counselling support in the business area. Since then it has moved to 2 new premises, one in Sao Carlos and another in Sao Paulo city, with larger areas to attend the growing demand of the engineering market. It relies on remarkably qualified human resources since it is near two important university centres (UFSCar and USP). Multicorpos enlarged its operation areas in 2005 for manufacturing, logistics and suppliers, counting on the skilled know-how of individuals from the automobile industry with extensive professional experience. Also, in 2007 Multicorpos entered the software representation business, adding to its portfolio MSC Software, CD Adapco, Dassault, Intercim and now VI Grade.
