

Business Consultant EMEA

Core responsibilities:

Reporting to the EMEA Professional Services Manager, you will accompany our European customers in implementing Pertinence Suite, the Intercim Solution, within their own business processes.

The implementation project consists of the interfacing of our Solution with the Operational systems in place but also the animation of Continuous Improvement projects (formalizing of the business process, industrial process mapping, data analyses, improvement plan design, process control strategy, traceability ...).

You will also partner closely with our sales team in order to demonstrate to our potential customers the value of our Solutions during the pre-sale process.

You will participate actively to the formalization of the best practices and knowhow of the consulting team and be often in contact with our Product team to feedback to it the customer's requirements and needs and promote to the customers the new product features.

Qualifications and skills:

- Engineer with 3 to 5 years of experience
- Production Management (Operation Management)
- Applications of the Digital Factory – ERP, PLM (SAP, Dassault System products, ...)
- IT project management, Industry and industrial processes knowledge
- Fluent in English, already practiced on a professional environment
- Knowledge on Life Sciences, Aeronautics or Automotive would be appreciated
- Quality Management and continuous improvement is a plus
- Dynamic, autonomous, motivated, ready to learn and open minded, good communication skills and listening

Salary/Benefits : Salary commensurate with experience

Job location: Paris, business trips in France and Europe
